I am deeply honored to present this paper, which has been completed under the invaluable guidance of Assistant Prof. Dr. Jirapong Ruanggoon and Associate Prof. Dr. Tachapong Settabutr. From the initial topic selection to the meticulous research design and the crafting of this paper, my advisors have invested immeasurable effort and dedication. Their profound expertise, humble academic attitude, open-minded approach to scientific research, tireless exploration of community greening and maintenance, and selfless work ethic have indelibly marked my journey, inspiring me to commit myself to continuous improvement in my future studies and work. In our daily interactions, the care and encouragement they extend to younger students have left an everlasting impression on our hearts, a flame that will never diminish. I extend my deepest gratitude and utmost respect to my esteemed advisors.
